

PSoC Designer Uninstallation Process

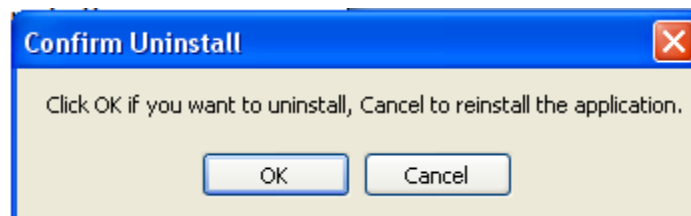

1. Close all the PSoC designer projects before starting the process.
2. Open the PSoC Designer installation setup launcher.

Double click on the setup launcher, it will start the InstallShield Wizard

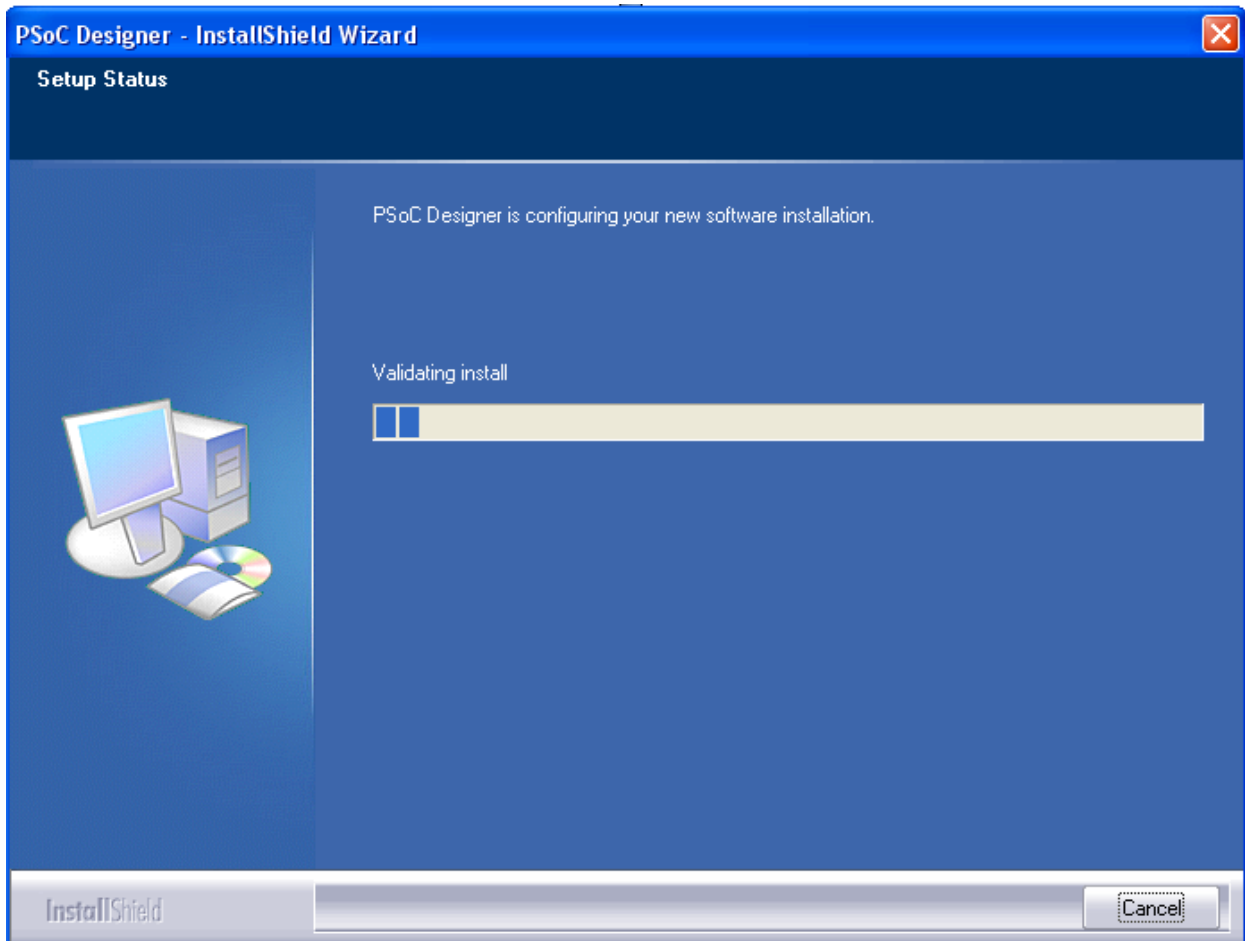

3. Then the wizard will ask to uninstall or reinstall.

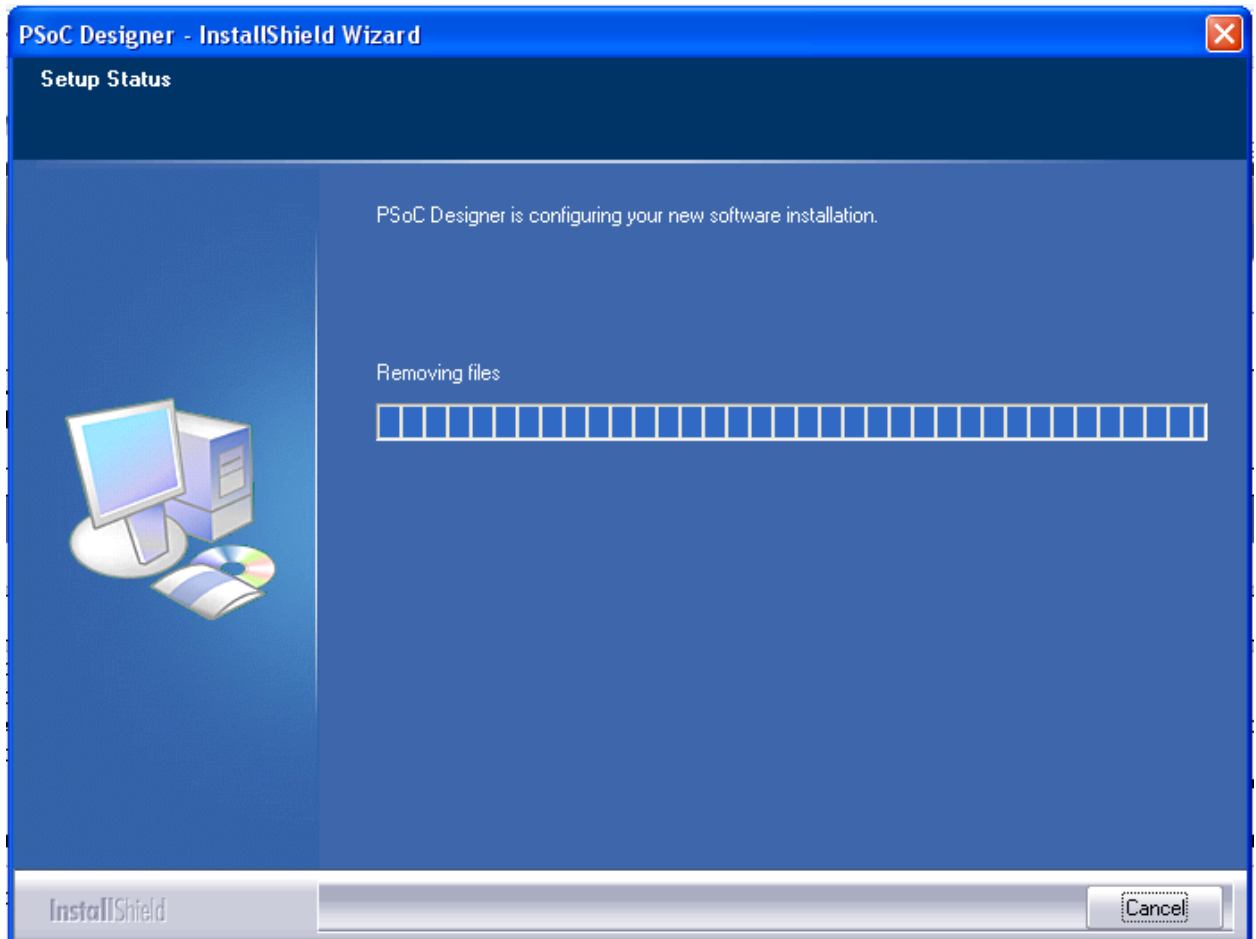

Select the "OK" button.

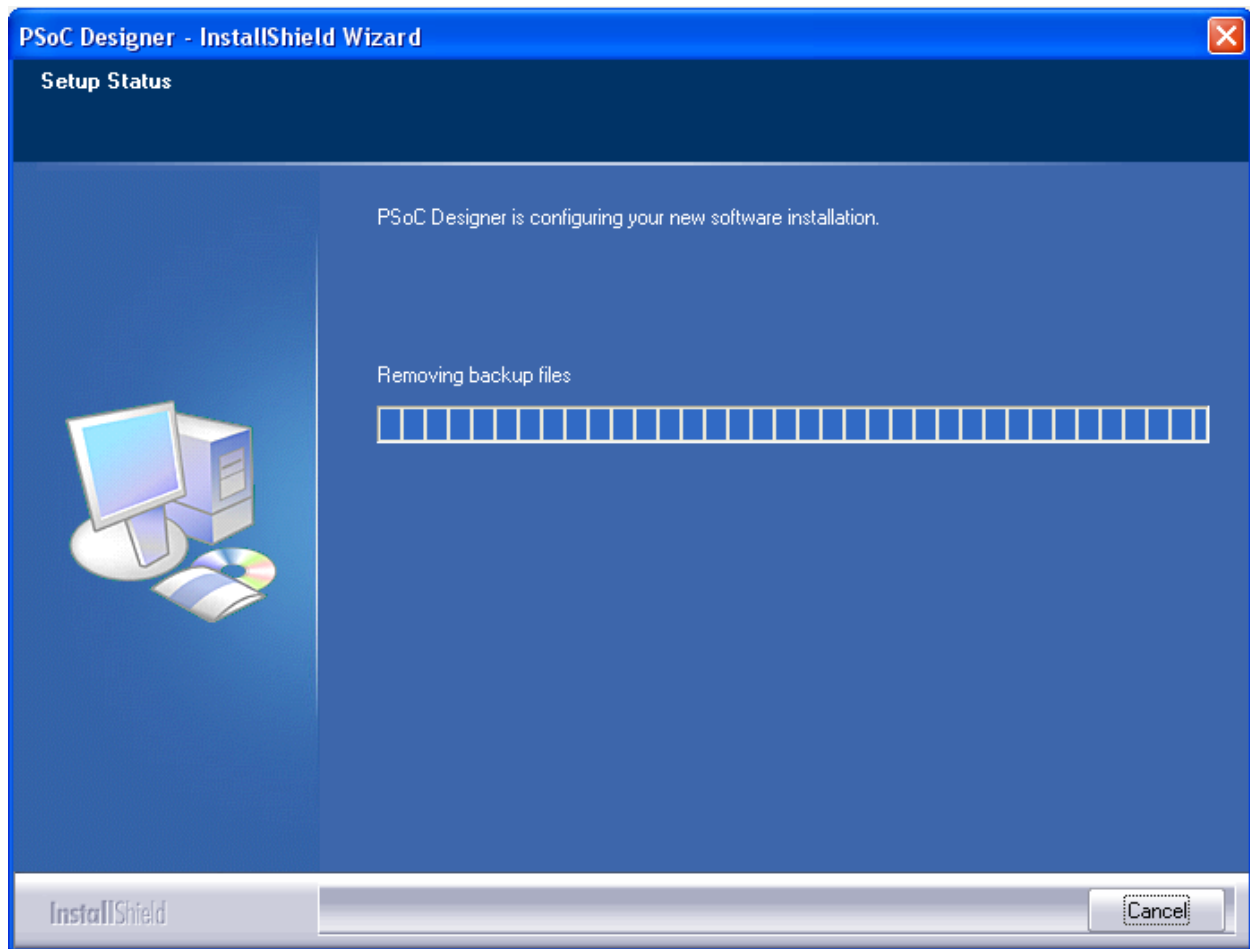

The Following window will appear.

Initially it will validate the install. It may take a few minutes .

4. After validation it will automatically start removing the files.

The overall process may take around 15-20 minutes.
