

HCI_VENDOR_SET_TX_PWR

There is a vendor HCI command to set TX power. If the customer has a HCI interface, they can send the following HCI command:

Command	Opcode	Param Length	Params	Recommended Param Values			
HCI_VENDOR_SET_TX_PWR	0xFDA5u	4 Octets	Channel ID, Power Level, ConnHandleLSB, ConnHandleMSB	param	size	Value example	
	OGF			OCF	Channel ID	1 octet	0x00
	0x3F			0x1A5	Power Level	1 octet	-20, -16, -12, -6, 0, 4 (use 2's complement for negative numbers)
					connhandle	2 octet	0x0000
