Letter of Similarity

Subject: BCM20732S, BCM20736S and BCM20737S

We, Broadcom Corporation, confirm that the BCM20732S, BCM20736S and BCM20737S are variants of the approved product:

Product Description: Bluetooth Module
Regulatory model name: BCM20732S

The 3 variants are pin to pin compatible modules with the same RF layout. Compared to the approved BCM20732S design, the BCM20736S and BCM20737S have the following changes.

1. BCM20732S – Base Part
2. BCM20736S – Adds Simultaneous Master Slave and A4WP to BCM20732S
3. BCM20737S – Adds RSA Security and NFC bridging capabilities to the BCM20736S

These changes do not affect RF parameters, such as output power, frequencies and modulations supported.
