Subject: Authorization to release information to GreenSoft Technology, Inc.

Dear Supplier,

Teledyne DALSA is committed to providing our customers with product that complies with environmental declaration requirements including, but not limited to:

- RoHS-2 (per EU Directive of 2011/65/EU and 2015/863/EU, which includes 4 new phthalates in addition to the original six substances)
- REACH (per EU Regulation EC/1907/2006)
- Substances of Concern In articles as such or in complex objects (Products) (SCIP – per Waste Framework Directive 2008/98/EC, amended by Directive (EU) 2018/851)
- China RoHS-2 (per Chinese government regulation - Administrative Measure on the Control of Pollution Caused by Electronic Information)

It is mandatory for our suppliers to support us in meeting these requirements.

We have contracted GreenSoft Technology (www.greensofttech.com) to work with our suppliers in collecting component environmental information. Typical information may include:

- RoHS compliance information including certificates of compliance.
- Full disclosure of material composition
- REACH SVHC certificates

As you may be aware, the REACH regulation adds new candidate SVHC (Substances of Very High Concern) to the list of materials to be declared every 6 months. Ideally, we like to have Full Material Disclosure on as many devices as possible thus eliminating the need to continually contact you. If we do not have full material disclosures, GreenSoft will contact you every six months for environmental documentation updates.

This letter serves as formal authorization for GreenSoft Technology to contact you and acquire the necessary information.

Should you have any questions or concerns, you may contact directly at Teledyne DALSA:

Dave Kennedy
Product Environmental Compliance
