Hello Achuth

I got some evidence. I tried on PSoC3 UART receiver

subroutine(A) is good result, subroutine(B) has a problem

Both send "Hello psoc"

I get display as hex code, then It must say a problem of sender, certainly.

You can see the same result.

How was that your trying?

Regards.

main()	subroutine(A)	subroutine(B)
caller →	subtest(1,0, "HELLO psoc "); // OK	DebugPrintc(1,0, "HELLO psoc "); //BAD
receiver C24223 A		
receiver PSoC3
